

FOGBUSTERS, INC.

CASE STUDY

Customer:	Cadbury Schweppes
Location:	Bristol, UK
Install Date:	December 2005
Industry:	Manufacturer of chocolate confectionary
Issues:	High fat (Palm Oil) in chocolate processing ending up in wash water. The building listed as 19 th century mill producing chocolate for over 100 years; consequently the drainage system was inadequate.
Solution:	Demonstrations using a Fogbuster system proved successful in removing the fat to less than 60ppm. Subsequently a 100 GPM Fogbuster Jr TM was customized for this site, using a heated oil valve as well as specialized filters.
Result:	The Fogbuster was successful in removing the Fat to below 60ppm and has relieved the pressure on the drainage system and the effluent plant.
